OUR MISSION

As a team, we are a shining light for others. We believe the best way to improve is by helping others. Whether outreaching to our school and community or connecting with other teams, we strive to be an example of gracious professionalism for others.

OUR ROBOT

Our strategy is entirely based around climbing. We've perfected our hook & winch design to reliably score climbers and hang as efficiently as possible, in every match.

We also have an autonomous that is continually being improved.
